

Brush Additive

Additive for brush and roller application

DESCRIPTION AND PROPERTIES

- Additive to improve the brush and roller application.
- It helps to eliminate bubbles formed with these types of application systems.

CHARACTERISTICS OF BRUSH ADDITIVE

Supply form	Liquid
Colour	Transparent
Specific weight	0,88 kg/l at 20⁰C
VOC content	877 g/L

MIXING RATIO ON PAINT

- 1-2% IN WEIGHT
- Shake energetically until the complete homogenization.

APPLICATION

It is convenient to reduce or eliminate the application solvent until an adequate viscosity is reached.

REMARKS

- A good agitation is required in order to incorporate the brush additive.
- For flat and smooth surfaces, it is recommended to use a foam roller with fine pores, rounded or concave at the ends to achieve the minimum formation of edges and lines.
- For irregular surfaces, it is recommended to use a furry roller or a dense foam roller because of their flexibility.
- The product may become cloudy in extreme temperatures. If this happens, it is necessary to warm the product. Properties are not affected.

EQUIPMENT CLEANING

Clean with cleaning solvent before the hardening of the product.
